

Iris Folding Template for Heart Shaped Cut-out

Instructions:

This design is done with three colors.

Tape your card cut-out face down over the template, lining the cut-out up with the outline on the template.

You will need about a 15 x 1 inch strip of decorative paper for each color.

Fold the strips of paper in half lengthwise and cut into the desired length as you go.

Tape strips of folded decorative paper over the spaces in the numbered, color-coded order, placing the folded edge of the paper strip toward the center of the design. Overlap the strips as you go.

Work from the outside in. Note that the numbers are color coded for easy placement.

When you are done, remove the cut-out from the template and turn it over. Glue or tape the cut-out to a card blank. Put a decoration in the opening in the center of the design.
